# Outline

- Review, understanding and what you can learn from the tradition design of Jewish tombstones
- How you can search for the location of the cemetery where deceased family members are buried
- Examples of searches in my family
- If time permits, some interesting tombstones I came across.

# Understanding the structure of traditional Jewish Tombstone

*Hertz Gordon, 1860-1939, buried in Eternal Home Cemetery (Calma, CA). The Hebrew text tells us his Hebrew name (Naftali), father's name (Liba Ber), Hertz Gordon was a Kohen — based on the two hands symbol, as well as on the Hebrew text. Inside the Star of David (between the birth and death years), there's Peh-Nun written. (Courtesy of Lizzie Fox)*

Jewish tombstones with Hebrew inscriptions have an added value to genealogists, in that they not only show the date of death and sometimes the age or date of birth, but they also include the given name of the deceased's father. This permits you to go back one more generation.

Here are a few helpful pointers if you cannot read Hebrew. At the top of most Jewish tombstones is the abbreviation

**פנ**, which stands for *po nikbar* or *po nitman*, meaning "here lies".

At the end of many Hebrew tombstone inscriptions

you will find the abbreviation **תנצבה**, which is an abbreviation of a verse from the Bible, the first book of Samuel, 25:29, "May his soul be bound up in the bond of eternal life".

If any Hebrew characters at all are written on a tombstone, they are most likely to be the person's Hebrew name. A Hebrew name always includes a patronymic, the person's father's given name. This is a unique feature of Jewish tombstones, and a great boon

to Jewish genealogy. The Hebrew word **בן**, *ben*, means "son of", as in "Yaakov ben Yitzhak", meaning

"Yaakov the son of Yitzhak". **בת**, *bat*, means "daughter of". On tombstones these words will often

appear as **בר**, an abbreviation for *ben reb*, meaning "son (or daughter) of the worthy", followed by the father's given name. The word *reb* is a simple honorific, a title of respect — it does **not** mean Rabbi.

### The Jewish Calendar

Dates are written in Hebrew according to the Jewish calendar. This calendar, which starts its "year one" with the Creation of the World, was probably designed by the patriarch Hillel II in the fourth century. He calculated the age of the world by computing the literal ages of biblical characters and other events in the Bible, and came up with a calendar that begins 3760 years before the Christian calendar.

The letters of the Hebrew Alphabet each have a numerical value, specified in the accompanying chart. When a Hebrew date is written, you must figure out the numerical value of each letter and then add them up. This is the date according to the Jewish calendar, not the calendar we use in every day life, known as the Gregorian calendar (also referred to as the Common Era, civil or Christian calendar). In September 1999,

for example, the Jewish year was 5759. Given a Hebrew date, you need to do only a little bit of math to change the Hebrew year into a secular year.

Often a Hebrew date after the year 5000 on the Jewish calendar will leave off five thousand. For example, the Hebrew year 5680 will be written as 680 rather than 5680. To compute the civil (Gregorian) year, simply add the number 1240 to the shortened Hebrew year.

Here's one example: If the year is written as **תרפג**, the letter **ת** is 400, the letter **ר** is 200, **פ** is 80, and **ג** is 3.  $400 + 200 + 80 + 3 = 683$ . The 5000 is usually left off, so the actual year would be 5683. By using our formula, 683 plus 1240 is 1923. That is the civil year.

## Hebrew Months:

תשרי	Tishri	Sep/Oct
חשוון	Heshvan	Oct/Nov
כסלו	Kislev	Nov/Dec
טבת	Tevet	Dec/Jan
שבט	Shevat	Jan/Feb
אדר	Adar	Feb/Mar
אדר ב'	Adar II	Mar
ניסן	Nisan	Mar/Apr
אייר	Iyar	Apr/May
סיון	Sivan	May/Jun
תמוז	Tamuz	Jun/Jul
אב	Av	Jul/Aug
אלול	Elul	Aug/Sep

The Hebrew year begins on Rosh Hashanah, which occurs on the Gregorian calendar in September or October. Therefore, the dates listed for the months of Tishri, Heshvan, Kislev and sometimes Tevet must be read as applying to the preceding year of the civil calendar.

The complete transposition of a Hebrew date to a Gregorian date uses a very complex formula. It is easiest to simply refer to one of the published or online reference works, such as: *The Comprehensive Hebrew Calendar, 5703-5860, 1943-2100* by Arthur Spier (Jerusalem, New York: Feldheim Publishers, 1981); or

<http://www.bolechow.org/pdf/ReadingTombstones.pdf>

*150 Year Calendar* by Rabbi Moses Greenfield (Brooklyn: Hotsaat Ateret, 1987). Most synagogues and Jewish libraries possess one of these works. Another alternative is to use one of several computer programs: CALCONV, JCAL, LUACH (shareware); Zmanim, HaYom, Itim (<http://www.davka.com>); or JewishGen's online JOS calculator (<http://www.jewishgen.org/jos>). These programs can convert Hebrew to Gregorian dates and vice versa, as well as display calendars and Yahrzeit dates for any year.

For more information about the Jewish calendar, see the JewishGen InfoFile [Introduction to the Jewish Calendar](#).

# Searching to find Ancestor's Grave

- If you know the cemetery
  - Google cemetery to see if they have a web site with a searchable database.
  - If not contact cemetery office and they can check manually (some may charge for this) and some can also provide a photo.
- If you do not know the cemetery, but have some idea of the city
  - Often if there is a Jewish Genealogy society in a city or region, they have a list of all the Jewish cemeteries in the area. I did this for the NYC area. The listing also included the web site if they had one.
  - Find one or two Jewish Funeral homes in the area and check if they have a web site, if they do, most have a listing of the Jewish cemeteries in the area.

# Searching to find Ancestor's Grave (Con't)

- If you have no knowledge
  - Try JOWBR (JewishGen Online Worldwide Burial Registry), <https://www.jewishgen.org/databases/cemetery/>
  - Also try Find a Grave, <https://www.findagrave.com/>
- When searching you may not have the exact name that is in the database
  - Many search programs give you option of “exact,” “sounds like,” and other similar choices.
  - If surname is very common, such as Levine, try to be as specific as possible, if not common, such as Wolarsky, you can be more generic, such as only search surname at first.
  - Be careful, often the name you know a person as may be a nick name and not the name in the database.
- Some examples I used to find some genealogy information about my family.

## Interment Search

Interment search allows for a comprehensive search of individuals buried at our cemetery.

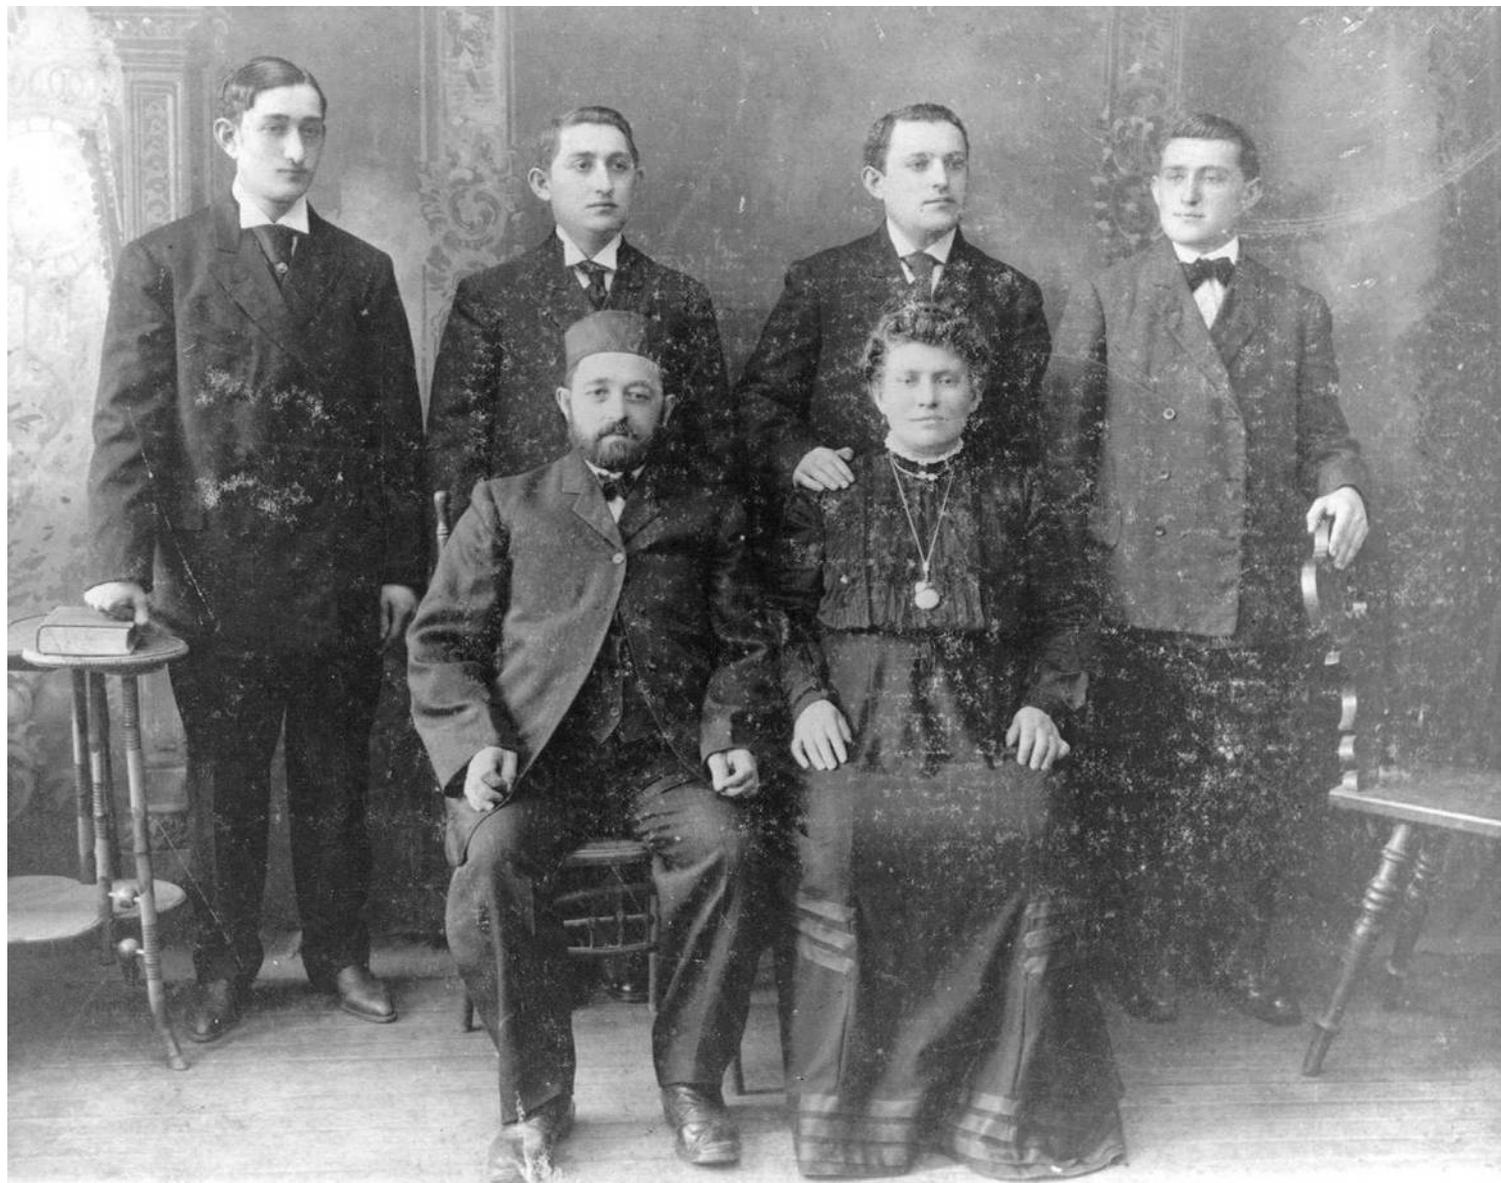

### While searching

If you are unsure of the name or spelling, it is best to enter as little information as possible to find the interment. Once you see the results, you can sharpen your search by entering more information. Remember, the more information you have in your search, the more limited your search will be.
